EROSION CONTROL PRACTICES FOR HOME CONSTRUCTION

Rain washes pollutants from home construction sites which contaminate streams and rivers. The pollutants include silt, oil, automobile fluids, paint, construction debris, yard waste, pesticides and litter. To help control runoff Erosion Prevention is required at each construction site. **The following is a list of procedures which must be implemented during construction of houses on residential lots.**

1. Install check dams, silt fence, and diversion dikes before clearing operations.
2. Provide and maintain during the entire construction period gravel construction entrance road.
3. After clearing and upon completion of construction provide temporary seeding or mulch.
4. Stockpiles of soil shall be covered with secure plastic sheeting or tarps.
5. Provide and enforce use of waste containers for litter.
6. Portable restrooms shall not be placed on street right-of-way or adjacent to inlets.
