

Jack,

After visiting the pond at 2921 Old Rocky Ridge Road, we identified two nuisance plants; spatterdock and filamentous algae. The spatterdock was mainly contained to the margins, and the filamentous algae was floating throughout the pond.

A herbicide treatment will be needed to control the spatterdock. Our quote for that treatment would be \$950.00.

We also recommend stocking 15 grass carp to help limit filamentous algae growth. The cost is \$8.00/carp = \$120.00.
